

WE CAN SEE THE BUTTERFLY
DRINKING THE NECTAR

WE THINK THIS IMAGE DESERVES AN AWARD. WE CAN SEE AND NAME THE FULL ANATOMY OF THIS TORTOISE SHELL BUTTERFLY VISITING POUR BUDDHLEA PLANT. YOU CAN EVEN SEE THE PROBOSCUS AS IT DRINKS THE NECTAR FROM THE FLOWER CUP.

THIS IS OUR FAVOURITE BUTTERFLY SPECIES- THE PEACOCK. IT LOOKS LIKE A FOX HIDING IN THE FLOWERS. WE HAVE TWO SPECIES OF BUTTERFLY WHO HIBERNATE IN OUR GARDEN OVER THE WINTER MONTHS.
